J. Becher & Associates Acquires Pro-Tech Security Systems, Inc.

J. Becher & Associates took a large stride in efforts to expand operations and capabilities with the acquisition of 27-year low voltage contractor veteran Pro-Tech Security Systems, Inc.

April 8th, 2022 – J. Becher & Associates announces the acquisition of Osseo based low voltage contractor, Pro-Tech Security Systems, Inc. “J. Becher & Associates is proud to be the company Sean Mazzei picked to carry on his legacy” says J. Becher & Associates founder, Jerry Becher.

Sean Mazzei, President/CEO of Pro-Tech Security Systems, Inc., has owned Pro-Tech since 1995, and brought on technician Shane Peterson in March of 2007. Ultimately, the duo decided it was in the companies best interest to bring their skillset to J. Becher & Associates.

The low voltage contractor for residential, commercial and industrial properties brings to JBA a variety of servicing expertise such as security systems, security cameras (CCTV), home theater, control access systems, whole house audio and structured wiring. “Pro-Tech is a great company whose core values align well with ours,” Becher says. “The growth should be seamless.”

About J. Becher & Associates

Since 1987, our mission has remained the same: quality workmanship, innovative design, and thoughtful customer service throughout all phases of a project, ensuring that your home is set up for long-term electrical performance. J. Becher & Assoc. is a full-service electrical and low-voltage contractor specializing in commercial, industrial, and residential electrical systems and electronic integration solutions. We specialize in full service residential electrical service and installation, commercial and industrial, CAD design and build, low voltage/integrated systems, service and maintenance.
